Patent No. US2002048763A1

GENERAL INFORMATION:

APPLICANT: Penn, Sharron G.

APPLICANT: Penn, David R.

APPLICANT: APPLICANT: Chen, Wencheng

TITLE OF INVENTION: GENE EXPRESSION ANALYSIS BY MICROARRAY

FILE OF INVENTION OFFE: 2001-05-23

PRIOR APPLICATION NUMBER: US 60/207,456

PRIOR FILING DATE: 2000-05-26

PRIOR PLING DATE: 2000-08-26

PRIOR PLING DATE: 2000-09-27

PRIOR PLING DATE: 2000-09-27

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 599408

GENERAL INFORMATION:

APPLICANT: Mechener, Eugene

APPLICANT: Mechener, Eugene

APPLICANT: Mechener, Igor B

TITLE OF INVENTION: Wathods and Reagents for Preparing and

TITLE OF INVENTION: Using Immunoligcal Agents Specific for P-glycoprotein

NUMBER OF SEQUENCES: 2

CORRESPONDENCE ADDRESS:

ADDRESSE: McDonnell Boehnen Hulbert & Berghoff Ltd.

STREET: 300 South Wacker Drive, Seventh Floor

CITY: Chicago

STATE: Illinois

COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gapa

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 1,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  US-USE JOE APPLICATION:
Sequence 1, Application US/08752447
Patent No. 5994088
GENERAL INFORMATION:
APPLICANT: Mechetner, Eugene
APPLICANT: Mechetner, Eugene
APPLICANT: Methods and Reagents for Preparing and
TITLE OF INVENTION: Using Immunoligcal Agents Specific for P-glycoprotein
NUMBER OF SEQUENCES: 2
CORRESPONDENCE ADDRESS:
ADDRESSE: McDonnell Boehnen Hulbert & Berghoff Ltd.
STREET: 300 South Wacker Drive, Seventh Floor
CITY: Chicago
STARE: 1111nois
COUNTRY: USA
ZIP: 60606
COMPUTER: ISH PC compatible
COMPUTER: ISH PC COMPUTE:
FILING SYSTEM: Release #1.0, Version #1.30
CURRENT APPLICATION NUMBER: US/08/752,447
FILING DATE: 15-NOV-1996
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        .

Sequence 3, Application US/0986686A

Sequence 3, Application US/0986686A

Patent No. US20020102244A1

GENERAL INFORMATION:

APPLICANT: Sorrentino, Brian

APPLICANT: Schwetz, John

ITILE OF INVENTION: A Method of Identifying and/or Isolating Stem Cells

FILE REFERENCE: 1340-1-021CIP

CURRENT APPLICATION NUMBER: US/09/866,866A

CURRENT PILING DATE: 2001-08-30

PRIOR FILING DATE: 2000-05-31

PRIOR FILING DATE: 1999-05-27

PRIOR FILING DATE: 1998-05-28

NUMBER OF SEQ ID NOS: 27

SOFTWARE: Patentin version 3.0

SEQ ID NO 3

LENGTH: 3860
                                                                                                                                                                                                                                                                                                                                                                                  GENERAL INFORMATION:

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
